DATASHEET

Zatebradine hydrochloride

Product overview

Name	Zatebradine hydrochloride
Cat No	HB1151
Alternative names	UL-FS 49
Biological action	Blocker
Purity	>95%
Description	HCN channel blocker. Potent, selective bradycardic agent.

Biological Data

Biological description	Hyperpolarization-activated, cyclic nucleotide-gated cation (HCN) channel blocker ($IC_{50} = 1.96 \mu M$). Potent and selective bradycardic agent that acts at sinoatrial node. Also blocks voltage-gated outward K^+ currents (I_K) and hyperpolarization-activated inward currents ($I(f)$). Exhibits little or no activity for L-type Ca^{2+} currents (I_{Ca}). Displays antiarrhythmic properties.
