DATASHEET

6-Amino-8-trifluoromethylphenanthridine

Product overview

Name	6-Amino-8-trifluoromethylphenanthridine
Cat No	HB3729
Purity	>99%
Description	Ribosome-borne protein folding activity (RPFA) inhibitor

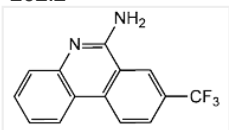

Biological Data

Biological description	Potent antiprion agent. Higher activity than 6-Aminophenanthridine. Ribosome-borne protein folding activity (RPFA) inhibitor. Binds to the ribosomal RNA and inhibits specifically the protein folding activity of the ribosome. Inhibitor of protein aggregation.

Solubility & Handling

Storage instructions	+4 °C
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Molecular Weight	262.2
Chemical structure	
CAS Number	651055-83-3
InChiKey	VBQYJKNVRUT AHL-UHFFFAOYSA-N
Appearance	Beige solid
