DATASHEET

Chloroguanabenz acetate

Product overview

Name	Chloroguanabenz acetate
Cat No	HB3834
Purity	>95%
Description	Antiprion compound. Protein aggregation inhibitor.

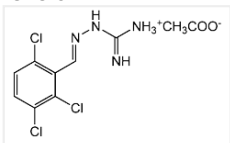

Biological Data

Biological description	Antiprion agent. Inhibitor of protein aggregation. Specifically reduces accumulation of a pathogenic fragment of Huntingtin in a transiently transfected cellular model of Huntington's disease (HD). Tool for treating HD and other polyglutamine expansion associated diseases.
-------------------------------	---

Solubility & Handling

Storage instructions	+4 °C
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Chemical name	1-[(E)-2,3,6-Trichlorophenylmethyleneamino]guanidine acetate
Molecular Weight	325.6
Chemical structure	
CAS Number	23113-55-5
InChiKey	DFBSKPLTAXXMPH-LAJPFITQSA-M
Appearance	White to off-white powder
