DATASHEET

Recombinant mouse GDNF protein

Product overview

Name	Recombinant mouse GDNF protein
Cat No	HB6816
Species of origin	mouse
Alternative names	Recombinant Mouse Glial-Derived Neurotrophic Factor, ATF1, ATF2, HFB1-GDNF, GDNF.
Purity	>98%
Description	Mouse GDNF recombinant protein

Biological Data

Application notes	The ED ₅₀ = 0.8-0.12µg/ml (as determined by the dose-dependent proliferation of C6 cells)
--------------------------	--

Solubility & Handling

Solubility overview	To make a stock solution, reconstitute in sterile 18MΩcm water at a concentration > 100µg/ml, which can then be diluted to make a working solution
Handling	• Solutions should be made in sterile deionized water (not less than 100 µg/ml). This solution can then be further diluted with other aqueous solutions. • Following reconstitution, solutions may be stored at 4°C and are useable for around 2-7 days and for future use store at -18°C. • For long term storage, a carrier protein (0.1% HSA or BSA) should be added to stock solutions. Solutions should be aliquoted into tightly sealed vials for storage at -20°C. Freeze-thaw cycles should be prevented.
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

UniProt ID	P48540
Source	E. Coli.
Appearance	White lyophilized powder (sterile filtered & freeze-dried)
Formulation	Lyophilized with no additional buffer or additives
