DATASHEET

Recombinant human CNTFR protein

Product overview

Name Recombinant human CNTFR protein

Cat No HB6845

Biological description The CNTFR (Ciliary Neurotrophic Factor Receptor) is a member of the type I cytokine receptor family.

CNTFR has been associated with variations in muscle strength, in addition to early onset of eating

disorders.

Species of origin human

Alternative names Recombinant Human Ciliary Neurotrophic Factor Receptor, Ciliary Neurotrophic Factor Receptor,

CNTF Receptor Subunit Alpha, CNTFR-Alpha, Ciliary Neurotrophic Factor Receptor Subunit Alpha, Ciliary neurotrophic factor receptor subunit alpha, CNTF receptor subunit alpha, CNTFR-alpha.

Purity >85%

Description Human Ciliary Neurotrophic Factor Receptor protein

Solubility & Handling

Handling

- Solutions should be made in sterile deionized water (not less than 100 μg/ml). This solution can then be further diluted with other aqueous solutions.
- Following reconstitution, solutions may be stored at 4°C and are useable for around 2-7 days and for future use store at -18°C.
- For long term storage, a carrier protein (0.1% HSA or BSA) should be added to stock solutions.
 Solutions should be aliquoted into tightly sealed vials for storage at -20°C. Freeze-thaw cycles should be prevented.

Important

This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

UniProt ID P26992 Source E. Coli.

Appearance Clear colourless solution (sterile filtered)

Formulation Solution (1mg/ml) containing 20mM Tris-HCl buffer (pH 8.0) and 10% glycerol
