DATASHEET

Recombinant rat CDNF protein

Product overview

Name Recombinant rat CDNF protein

Cat No HB8498 Species of origin rat

Alternative names Recombinant Rat Cerebral Dopamine Neurotrophic Factor, Cerebral neurotrophic factor, ARMET-like

protein 1, Arginine-rich protein mutated in early stage tumors-like 1, Conserved neurotrophic factor,

Cdnf, Armetl1.

Purity >97%

Description Rat CDNF protein

Biological Data

Application notes Enhances neurite outgrowth of E16-E18 rat embryonic cortical neurons when immobilized at 5-25

μg/mL on a nitrocellulose-coated microplate.

Solubility & Handling

Solubility overview To make a stock solution, reconstitute in sterile 18MΩcm water at a concentration > 100μg/ml, which

can then be diluted to make a working solution

Solutions should be made in sterile deionized water (not less than 100 μg/ml). This solution can then be further diluted with other aqueous solutions.

• Following reconstitution, solutions may be stored at 4°C and are useable for around 2-7 days

and for future use store at -18°C.

For long term storage, a carrier protein (0.1% HSA or BSA) should be added to stock solutions.
Solutions should be aliquoted into tightly sealed vials for storage at -20°C. Freeze-thaw cycles should be prevented.

Important This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use

Chemical Data

UniProt ID P0C510 Source E. Coli.

Appearance White lyophilized powder (sterile filtered & freeze-dried) **Formulation** Lyophilized from a 0.2µm filtered solution in PBS (pH 7.4)
