

## DATASHEET

### Goat Anti-Rabbit IgG H&L (Janelia Fluor® 525) preadsorbed ValidAb™

#### Product overview

|             |   |
|-------------|---|
| Name        | Goat Anti-Rabbit IgG H&L (Janelia Fluor® 525) preadsorbed ValidAb™  |
| Cat No      | HB6813  |
| Host        | Goat  |
| Clonality   | Polyclonal  |
| Target      | Rabbit IgG H&L  |
| Conjugate   | Janelia Fluor® 525  |
| Description | Goat Anti-Rabbit IgG H&L Janelia Fluor® 525 secondary antibody. Part of the ValidAb™ range of highly validated, data-rich antibodies. |

#### Validation data

#### Product information

|               |  |
|---------------|--|
| Immunogen     | Purified rabbit IgG  |
| Purification  | Immunogen affinity chromatography. Pre-adsorbed with human, mouse and rat serum proteins |
| Concentration | 1mg/ml   |
| Formulation   | 20% glycerol in PBS with 0.05% sodium azide and 1% recombinant albumin                   |

#### Tested applications

|                               |   |
|-------------------------------|---|
| Applications                  | FACS and flow cytometry, ICC, live cell imaging, IHC(IF)  |
| IHC(IF) optimal concentration | 1:300 to 1:2,000 dilution (0.5 - 3.3µg/ml). Optimise dependent upon assay. A good starting point is 1:500 (2µg/ml). |
| ICC optimal concentration     | 1:300 to 1:2,000 dilution (0.5 - 3.3µg/ml). Optimise dependent upon assay. A good starting point is 1:500 (2µg/ml). |

**Applications**  
**Negative control**

FACS and flow cytometry, ICC, live cell imaging, IHC(IF)  
While this antibody has been cross-adsorbed to reduce non-specific binding it is still often worthwhile to conduct a control experiment where the primary antibody is omitted to give confidence that the staining pattern observed is specific.

---

## Storage & Handling

**Storage instructions** +4°C

**Important** This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use
